Scenario 7

Starting in a Remote Team

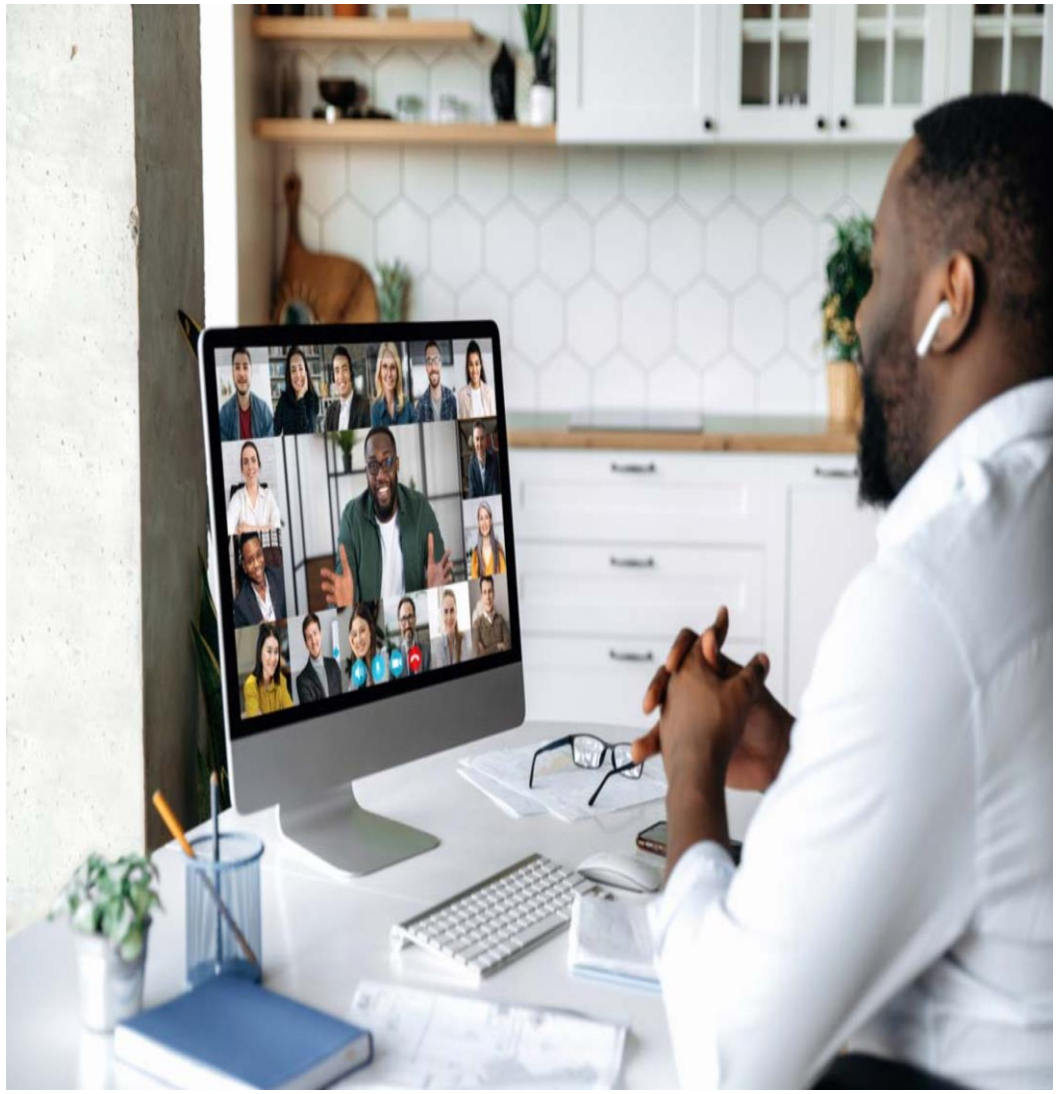
Onboarding, Access Requests, Tickets, and Daily Stand-up

远程团队入职第一周：权限申请、工单系统、敏捷协作与 Daily Stand-up

Session Focus

Practical working English for your first week in a global or remote engineering team.

- onboarding workflow
- SNOW / access requests
- Jira / ticketing
- stand-up updates



1. Why This Stage Matters

Why work English matters after you get the offer / 为什么入职后的工作英语也很关键

After joining a team, you do not need perfect English — but you do need clear working English.

Your first week usually involves onboarding, access setup, ticket reading, and team communication.

In remote teams, collaboration often happens through tools, short updates, and asynchronous messages.

The goal is simple: sound clear, calm, professional, and easy to work with.

重点不是复杂表达，而是“说清楚、能推进工作”。

Key takeaway

Practical English helps you become operational quickly in a new team.

2. What Usually Happens in the First Week

People + Systems + Workflow / 人、系统、流程

People

Manager
Mentor / buddy
Reviewers
Approvers / owners

Systems

Slack / Teams
Jira / Confluence
GitHub / GitLab
SNOW / internal portals

Workflow

How work is assigned
How priorities are tracked
How blockers are raised
How stand-up is run

Your goal is not to know everything immediately.

Your goal is to start becoming operational and collaborative.

英文表达重点：ask, clarify, update, and align.

3. Access Requests and SNOW / ServiceNow

How to ask for access professionally / 如何做权限申请

What access do you need? → Why do you need it? → How urgent is it? → Who approves it?

Example request

“Could you help me request read access to the production dashboard?”
“I need it to understand service behaviour during onboarding.”
“If possible, it would be helpful to get this before I start the next task.”

Common access types:

repository / cloud console

database read access

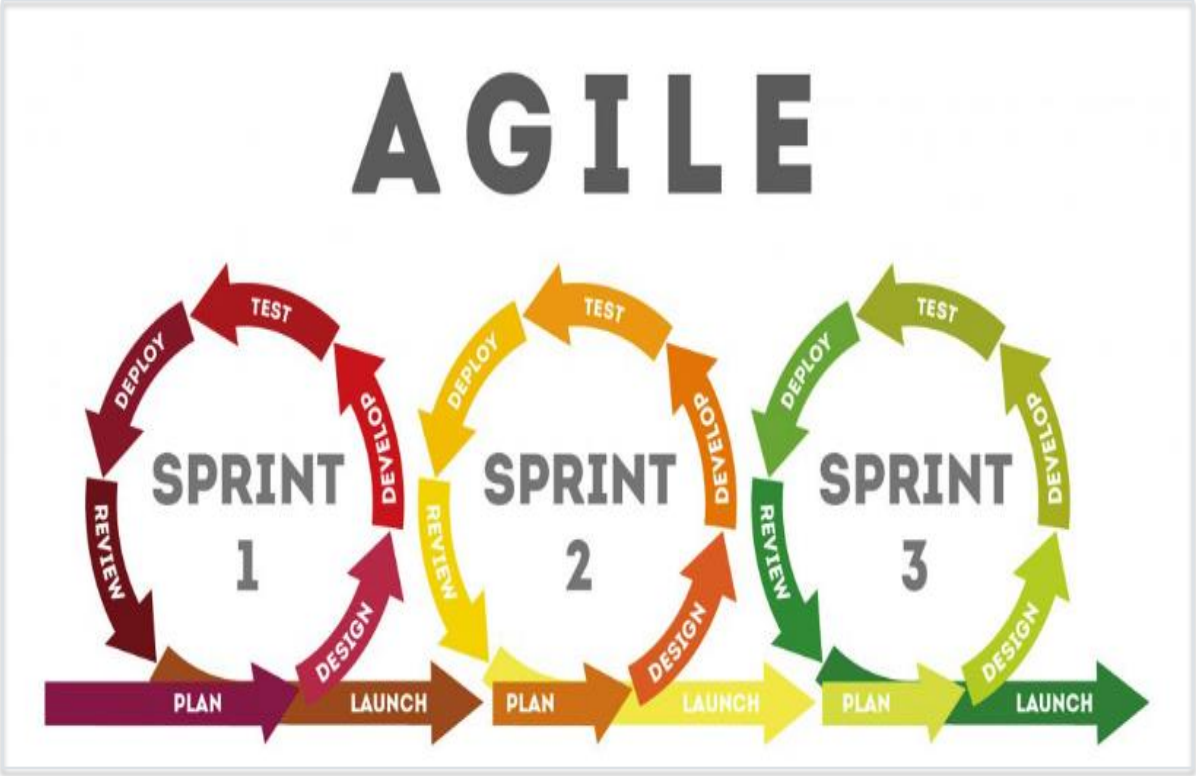
dashboard / monitoring access

production read-only access

关键词：access request / permission / approver / justification

4. Agile Basics: Sprint, Kanban Board, and Team Rhythm

敏捷协作基础：迭代节奏与任务流转



Agile teams often work in short cycles called sprints.

A Kanban board is a visual board that shows the status of work.

Typical columns: To Do → In Progress → In Review → Done → Blocked.

Stand-up, review, and planning meetings help the team stay aligned.

理解 sprint / backlog / board / blocked 这些词很实用。

Useful terms

Agile, sprint, backlog, assignee, priority, blocked, in progress, review

5. Jira Tickets and Ticketing Systems

How to read a ticket and give a useful update / 如何读懂与更新 ticket

Sample Jira Ticket

Summary: Set up staging dashboard access

Type: Task

Priority: Medium

Status: In Progress

Assignee: Your name

Acceptance Criteria: Access confirmed and dashboard view tested

When reading a ticket, identify:

what the task is

what the expected outcome is

what the current status is

what is blocking progress

Useful update examples:

I’ ve started looking into this issue.

The remaining work depends on access to the staging environment.

I’ m blocked on this ticket because I don’ t yet have permission to view the dashboard.

6. What Daily Stand-up Is

Short, clear, and action-oriented / Daily stand-up 是什么

Daily stand-up = a short team sync to keep everyone aligned.

1) What I did yesterday
2) What I’m working on today
3) Any blockers

Sample stand-up

“Yesterday I spent some time getting familiar with the deployment workflow and reading through the related Jira tickets.”

“Today I’m planning to continue with the onboarding tasks and request access to the staging environment.”

“The only blocker at the moment is that I’m still waiting for repository access.”

不要讲太长，重点是 concise, clear, useful.

7. Useful Phrases and Final Takeaways

让自己听起来像一个能顺利融入 remote team 的工程师

Useful phrases

Could you help me request access to…?
Just to confirm, should I start with this ticket first?
I’m currently blocked by…
The next step on my side is…
I’d like to clarify one point before I continue.

Mini first-week checklist

Understand who owns what
Learn the tools and workflow
Ask for access with context
Read tickets carefully
Keep stand-up updates short and clear

Final message

A strong first-week impression does not come from perfect English. It comes from sounding clear, calm, and easy to work with.
